

DISPLAY DAY.

PRINCE HENRY HOSPITAL MUSEUM.

Sunday 30th October 2024.

This display day harkens back to our successful carpaccinos at this very site in February of this year where a tour of the museum had been organised by our intrepid event's director, Mark....Adrienne, the museum's curator, was apparently so taken with our cars that she asked if our club could do a display at some time in the future....and voila the 30th October eventually became the day!

Permission was sought and given by the local council to park on the footpath/grass fronting the museum and the event was off and running.

The only proviso for this event was that the cars had to be at least 30 years oldeasy, with Henry by far being the oldest one there!

Pete's Morrie/ Bob's V12. Chris's Daimler/Lofty's Studie.

Lineup.

XD Falcon.

Sigma.

Henry in front.

One drawback to the day was the early start of 8.00 am...however all were present and accounted for by the set time although some complaints were noted re the cold....so hot later that some were worried about sunstroke!

But the weather was perfect!

Members guarding their treasures.

Of note was that symbolically there was a **'Henry'** parked in front of the Prince **Henry** Museum!

The display was extremely popular with a constant flow of spectators during the day...so popular was the event that we have been invited back for 2025 but this time no age limit on the cars...all 'moderns' welcome!

There were markets on the verandah of the museum and opposite the venue some eateries whose offerings were put to good use...nice coffee indeed!

At various times we had up to 24 cars being displayed...Fords, Studebakers, a lone Daimler and Roller, a couple of Mustangs etc....and with over 30 members in attendance!

Bob's Jag.

Tony's Merc.

Visiting Studie.

Herz's Sunshine.

Well done to all concerned.
