

TECH DAY AND BBQ.

Workshop Michael's Restoration.

Saturday 30th August, 2025

Meeting time was on site at 10.30 but your humble scribe, arriving early at 10.15, was preceded by at least 15 members, chatting about cars, helping set up the BBQ etc.

And what a lovely day for this event...sun shining, negligible wind and good company as per usual!

28 members and 22 cars of varying makes and sizes made the journey to Seven Hills and were treated to a magnificent display of the ongoing rescue of classic cars, mainly Rovers interspersed with a couple of Mercedes!

What will happen in years to come when talents such as these are no longer available?

Also of interest was the appearance of Ken's 'new' Citroen DS...a bit of a story there!

And we were also treated to the many talents of Julian's, our 'chef' for the day!

To finish off the day a certificate of appreciation was presented by Dennis to our host.

Father and son.

Once again thanks to the Parker's and Mark for another successful and enjoyable foray into the classic car world.

ED.
