

TECH DAY-----Super Start Batteries.

Saturday 12th December 2026.

Meeting time was 10.30 on site at their warehouse/sales department at unit 30/76 Hume highway, Lansvale....and plenty of offstreet parking in to the bargain

The event was certainly well attended with 20 fully charged members awaiting a boost in their battery education!

Super Start Batteries, originally operating from a van in Sydney's western suburbs since 1995, has established itself as a leading battery distributor....the business expanded over 3 decades and includes the majority of batteries...automotive, truck, marine, lead acid and lithium batteries etc. plus solar batteries.

Products are distributed nationwide and the company has a strong connection to global networks of research, development and advanced manufacturing techniques and is recognised as one of Australia's largest suppliers.

The company is 100% Australian owned.

Following the traditions of our club a certificate of appreciation was presented to all involved.

Then came the BBQ...gourmet sausages if your humble scribe is not mistaken...is this the reason Mark brings Cindy who has now been promoted the position of cook at our BBQs by the looks of it....and thanks to all our sponsors, only \$5 per head!

On the day we had 3 members' cars making their first appearances.

The Roberts' Audi.

John Linders' **new** Merc,
rebought from Nick after
selling it to him 20 years ago!

John Hertz's Merc.
Leased after 1 year of
production. His first
company car!

And some other iconic cars....check the gallery!

Mark just keeps on keeping on...thanks mate.

ED.
