

TECH DAY...SRK UPHOLSTERY.

Saturday 13th June 2026.

42 Wattle St. Ultimo.

Meeting time was for 10.30am with plenty of parking available on the premises.

And what a tech day unfolded... where does Mark continually find such amazing places?

Being a little apprehensive of inner city driving my home departure was on the 'safe' side leaving what I considered to be plenty of leeway to reach said destination on time but 45 minutes prior to start commencement was certainly more than adequate! Upon arrival I was immediately gainfully employed as traffic controller and parking advisor!

The quality of craftsmanship and the attention to detail in all aspects plus over 20 years of combined experience was certainly proven by the number of fantastic and expensive motorcars on hand! Ray Goodman had his Roller interior done there and it is flawless... member John Herz has his immaculate SL500 in its final stages of completion at the present moment!

John's SL500 patiently waiting for materials from England!

Mark provided morning tea which was appreciated by the 30 plus members on hand!

Just some of the happy members.

After a brief welcome and rundown of the history of the business etc by the owners, members were free to wander and admire the works in progress!

Around 11.30 certificates of thanks were presented by Dennis and the hordes began to dissipate for lunch to places unknown...the Fish Markets were certainly close!

Editor's choice...paddock find...never registered, used on a farm as a paddock basher...check out the concave tailgate (used for standing on) and the wooden ute tray. The vehicle is totally original and is never to be restored! I wonder how many offsprings learnt to drive in this?

Once again special thanks to Mark for his never ending efforts!

ED.
